RE: Michigan Infrastructure & Transportation Association  
Road Agreement

This letter is being sent to clarify some misconceptions that you may have regarding the former Michigan Infrastructure & Transportation Association (MITA) Road Agreement.

MITA sent the Operating Engineers Local 324 (Local 324) a termination letter for the Road Agreement. Local 324 accepted this termination of the agreement and withdrew from multi-employer bargaining. Local 324 also sent timely termination letters to all road contractors expressly terminating the MITA Road Agreement.

There is not, have not, nor will there ever be, negotiations between Local 324 and MITA for a multi-employer Association contract. We have had many calls from our membership confirming that some companies are telling their employees that there are current negotiations or that there will be negotiations for a multi-employer Association contract at some time. This is false.

You should now have a correct understanding of our position regarding MITA.

Thank you,

Douglas W. Stockwell  
Business Manager & General Vice President
