

Ambulance (110 words)

I watched a TV news story while I was in Lansing last week that said Michigan's crumbling roads are threatening the safety of patients being transported and treated in ambulances. The headline on the story was, "Potholes creating dangers for first responders." The story said that pothole-ridden roads are slowing ambulances already in a life-or-death time crunch and making the ride uncomfortable for patients traveling to the hospital. It is truly shameful that Michigan's roads have become so dangerous. Proposal 1 will increase funding for transportation, roads and bridges. For safer roads and bridges, repaired with funds guaranteed in the constitution for transportation only, I'm voting yes on Proposal 1.
