The Michigan Department of Transportation (MDOT) seeks to engage Detroit-based minority-owned firms and workforce development partners in the pre-construction and construction activities of the I-375 Reconnecting Communities Project.

As part of the Project, there will be a robust small business and workforce development framework.

Please attend this forum to learn about DBE goals, the project delivery method, upcoming requests for proposal (RFP), and MDOT certifications and prequalifications.

Project details are available at Michigan.gov/I375.
