AditxtScore™
For Covid-19

In the Workplace

WEAK
POSITIVE

- +

How is AditxtScore™ Different from Other Antibody Tests?

Antibody tests can vary from one to another. AditxtScore™ provides a comprehensive profile with 10 measures for a more complete picture of an individual's immune response to the virus and/or vaccine.

Benefits to Employers:

- **Save time and money** due to less frequent COVID testing
- **Minimize lost time and wages** for employees with less frequent quarantines
- Keep employees safer by identifying those employees **most at risk**
- Help employees make **data-driven decisions** on the timing of vaccines and boosters
- Potentially assist with **vaccine hesitancy**

How Often Should You Re-Test?

For those determined to have robust immunity, consider re-testing every 90-120 days.

What is Your Score?

Have you developed an **immune response** based on past exposure to the SARS-CoV-2 virus and/or the COVID-19 vaccine?

Is your immune response **robust?**

Is your immune response **likely to provide some protection** against future infection?
