

CONTRACTOR ANNOUNCEMENT

Enhanced Bidding Starts September 4, 2026

A significant upgrade is coming to the bid submission process. Starting with the September 4, 2026, bid letting, new enhanced bidding workflows will provide a more streamlined and accessible experience.

This transition will bring a number of key benefits, including:

- **A seamless, browser-based experience:** Bid completion and submission will now be directly in Bidx.com, eliminating the need for installed software like AASHTOWare Project Bids™.
- **Wider compatibility:** The new system works with all modern operating systems and browsers, including Mac users.
- **Streamlined workflow:** Upfront bidding requirements like Bidder ID and the Infotech® Digital ID™ will be integrated into a new, intuitive workflow.
- **Automatic publishing of bids:** Apparent bid results will be available as soon as the letting is complete.

Please visit the [Knowledge Center Contractor Toolkit: Bid Submission in Bidx.com](#) for more information.
